PROJECTS

- My Clinic App** [click to Open](#)
A MERN fullstack CRUD application I made for the dental clinic I work part-time at. It allows us to store patients' data in an organized database, allows searching patients using various criteria and filters, and exports data to a CSV file.
- Personal Bookshelf** [click to Open](#)
Allows users to search books using Open Library API. also users can save their favourite books in a personal bookshelf.

MINI PROJECTS

- TrackasYouSpend** [click to Open](#)
It is a site that allows users to track their money as they spend it. Very helpful in tracking and saving money.
 - SignScraper** [click to open](#)
SignScraper is a site that allows users to sign their signature on a canvas. You can download that sign with its background removed, hence the name SignScraper.
 - KnowYourWeather** [click to open](#)
KnowYourWeather is a simple project that I made in the initial days of my journey of learning web development. It helps users keep track of the weather in their cities with the help of the OpenWeatherMap API.
- Technologies Used in Above Projects**
React, Node.js, Express, JavaScript, HTML, CSS.

EXTRA CURRICULAR

- Participated in multiple inter-collegiate festivals and won various prizes in quizzes, cricket, and treasure hunts.

HOBBIES

- Current affairs, International Relations
- Loves cinema and music

LANGUAGES

English, Marathi, Hindi
